The Republican party cannot nomnate a man for whom he would not take the stump; and it is needless to say that he would be the most effective of all the party artillery.

Got Him on the List. NEW YORK, April 1 .- Jacob Sharp will be the next one of those indicted for com-

plicity in the Broadway steal to be brought to trial.

This has been definitely decided upon by District Attorney Martine, and the preparation of the case for presentation to a jury is now in active progress.

Sharp's trial was decided upon because the District Attorney does not wish to run the risk of another disagreement in the Cleary case. So he proposes to first try some of the alleged tempters in the Ismous case, as this will bring out an entirely new line of evidence which has not been hinted at by the people of the District Attorney's office. This, it is now intimated, will be of a very sensational character, and after having been made available in the trials of the chiefs of the conspiracy, can then be used against the Aldermen who have not yet been tried.

The date of Sharp's trial has not yet been fixed, but it will probably be early in May, as soon as District Attorney Martine can get a judge before whom he can try the cast. The engagements of the availing judges are such that a trial cannot be reached during the present month.

of the Amendment was not made a party issue, but was advocated and lorcod from the desperately resisting liquor power and its allies, by the friends of home and humanity of all parties, makes it especially obligatory upon the friends of temperance of all parties and classes, to unite now in one combined charge to carry prohibition to its final success at the ballot box. As the allied home forces carried the enemy's outer works in the Lexislature, as let the same forces press forward to final victory at the polls, and plant the prohibition flag in the citadel of our rights and liberties, our State Constitution.

I have conferred with a goodly number of Democrats and Republicans, some of whom will vote for ratification while some will yote against it, and they all express the desire that the question will be left free from all party alliances, and that the people of all parties may be allowed to yote upon the question solely on its merits. It this is done there cannot be much doubt about the ratification of the amendment; but if one of the old political parties antagonize it, and the other should take it up, its adoption, under such circumstances, will be exceedingly doubtful.

The Prohibitionists are going to do vigorons work this pear throughout the "rural decstrict" voters if it can be done—and they seem to think it can.

is powerless, even if assented to, to prevent the French and Americans from procuring bait, and that it would create unbearable monopolies in the bait, banking and herring fisheries and ruin thousands of our fishermen. Again and again they sounded this alarm, but the government suppressed their speeches. They protested and spoke against the bill, and the government dared not suppress their speeches a eccond time.

"From being a popular measure the bill has become a most unpopular one, and it is afe to say that the government itself will now take steps to have it disaltowed. They could not enforce its provisions; they dared not if they could, and they will doubtless prefer to back down now rather than after the bill has been assented to by the Queen in council.

Maryland Penches Still Safe.

Maryland Peaches Still Safe.

Washington, April 1.—Two dispatches from the peach region of Maryland say that the fruit buds are as yet uninjured. A special from Cambridge says: "Since the cold snap of Tnesday night the peach prophet shakes his head ominously. The general impression, however, seems to be that the buds have received no material damage. Although the temperature was low, the trees were dry and were, therefore, in a better condition to resist the damaging influences of the cold than if the boughs had first been soaked with rain and afterwards frozen. The light yield of last season, it is also thought, has given renewed vigor to the trees, which will enable them the better to resist the shock. So far as can be learned the outlook for a fair yield in Dorchester county is good."

A New Firm.

Mr. I. G. Dillon has admitted to partnership with him Messrs. Joseph M. Weistling and Charles N. Hancher, two popular gentlemen who have been with him in his large jewelry store at No. 1223 Market street for several years past. The firm will hereafter be known as I. G. Dillon & Co. The two new members have been faithful employes for a long time and in admitting them as partners in his large and paying business Mr. Dillon shows a just appreciation of their business qualtities. Their many friends will be pleased to learn of their advance and will wish the new tirm long and continuous prosperity.

with sales of 45,000,000 bushels for the week, exports continuing heavy. Corn, oats, oil and pork products, sugar and tea have scarcely changed with moderate dealings. Coffee advanced a quarter of a cent. Cattle and wool are weaker, with tin and copper. Cotton has boomed with sales of 1,098,200 bales at New York in six days. Print cloths are barely 3.39 cents, with only 188,000 pieces in sight against 1,584,000 pieces thirty days ago. Iron is weaker at Philadelphia and Pittsburgh. The collapse of the coal combination and higher and fixed rates for transporting coal do not encourage consumers. Whether the bank clearings outside of New York ranging above isat year's indicate more than a temporary activity, cannot yet be judged. But the great reduction of rates on the Canadian canals for shipments to Canadian ports, and the stitlede of the Grand Trunk toward other trunk lines, foreshadow sharper competition between Canadian and New York forwarding merchants as other new arrangements indicate manufacturing development in Canadian.

reaching \$7,602,048, against \$7,001,110 last year.

Money has ranged from 3 to 8 per cent for the week, but operations to cause stringency will now be increasingly difficult every day, unless an unusual outgo of money should set in as in 1884, in place of the return customary in April.

The failures during the first quarter of 1887 were smaller than in 1880, 1885 or 1884, but the aggregate of liabilities was larger than last year, not because of a general enlarging of indebtedness, but because a few unusually heavy failures were included. Failures in the last seven days number for the United States 196, Canada 27; total 223, with 259 last week and 214 the corresponding week last year.

Condition of Cattle.

Condition of Cattle.

FT. WORTH, TRX., April 1.—Col. S. P. Cunningham, agent of the Bureau of Animal Industry, recently visited Southwest Kansan, New Mexico and Colorado.

He reports cattle on the ranges of New Mexico, Indian Territory and Colorado to have come though the winter in excellent shape, and with but slight losses.

His trip was made in the interest of the spring movement of Texas cattle, and he reports the sanitary boards are inclined to be as lenient to Texas cows as due regard to the health of their own State cattle will admit. He does not think the demand for cattle will be great, and at prices mentioned can see no great inducement for Texas to sell.

There will be united action among State, Territory and National sanitary boards to prevent contagions pleuro-pneumonia crossing the Mississippi river.
